

PRODUCT DATA SHEET

Micro200HF Sensor

Very Wideband Frequency Miniature Sensor

DESCRIPTION AND FEATURES

MICRO-200HF sensor has a good frequency response over the range of 500 – 4500 kHz. Its small size and high bandwidth makes the sensor an ideal candidate for applications where high fidelity AE signals from multiple modes are a necessity. The sensor features a small diameter, microdot connector exiting from the side of the sensor.

APPLICATIONS

The rugged stainless steel cavity along with its small size and weight makes it an ideal sensor for structural health monitoring. The sensor can be used in applications requiring very high bandwidth to determine the predominant frequency bandwidth of AE sources and noise discrimination. It can be easily mounted using epoxy.
